

RESEARCH INTEREST

A central theme of my research focuses on making scalable Optimal Transport. In particular, I develop dimensional reduction methods and sub-sampling methods (mini-batch techniques) for Optimal Transport. I am also interested in applications that need to deal with probability measures.

EDUCATION

University of Texas at Austin

Austin, Texas, USA

Ph.D. in Statistics at Department of Statistics and Data Sciences

2021–Present

Hanoi University of Science and Technology (HUST)

Hanoi, Vietnam

Bachelor in Information System (another name of Computer Science)

2015–2020

- GPA: 3.61/4.00, Major GPA: 3.71/4.00, Top: 1%, graduated with Excellent Degree.
- Thesis: “Distributional Sliced-Wasserstein and Applications to Generative Modeling”

EXPERIENCE

VinAI Research, *website: www.vinai.io*

Hanoi, Vietnam

AI Research Resident

2019 –2021

- Research topics: Deep Generative Models, Optimal Transport
- Advisors: Dr. Hung Bui (Director of VinAI Research), Dr. Nhat Ho (Assistant Professor at UT, Austin)
- Skills gained: Deep Generative Models (VAEs, GANs, Flows, and Score matching models, etc), Optimal Transport (Sinkhorn algorithm, Slicing approaches, Barycenter, variants of Wasserstein distance, Gromov Wasserstein, etc, Applications of OT (Wasserstein Autoencoder, Wasserstein GAN, Color Transfer, etc)

Data Science Laboratory (HUST), *website: ds.soict.hust.edu.vn*

Hanoi, Vietnam

Undergraduate Research Student

2018–2020

- Research topics: Probabilistic Graphical Model, Continual Learning.
- Skills gained: Fundamental Machine Learning and Deep Learning, Topic models, Bayesian inference, Variational techniques, etc

Distributional Sliced-Wasserstein and Applications to Generative Modeling *Khai Nguyen, Nhat Ho, Tung Pham, Hung Bui*

- *Arxiv*: <https://arxiv.org/abs/2002.07367>
- *International Conference on Learning Representations (ICLR) 2021 (Spotlight 3.8%)*

PROFESSIONAL SERVICES

- Reviewer at International Conference on Machine Learning (ICML) 2021
- Reviewer at Conference on Neural Information Processing Systems (NeurIPS) 2021
- Reviewer at International Conference on Learning Representations (ICLR) 2022

AWARDS

- Doctoral Fellowship of University of Texas at Austin 2021
- Third Prize of Scientific Research Student Award of Hanoi University of Science and Technology 2019

OTHER ACTIVITIES

Top 2% (19 over 1317) in Plant Pathology Challenge CVPR 2020
Fine-Grained Visual Categorization (FGVC) workshop May 2020

Southeast Asia Machine Learning School Greater Jakarta, Indonesia
Universitas Indonesia July 2019

Technical Talk Hanoi, Vietnam
Data Science Laboratory (HUST) June 2019

- Make an introduction to Optimal Transport and its applications in deep generative models.
- Slides: <http://bit.ly/3pDEp1f>

Teaching Assistant Hanoi, Vietnam
Data Science Laboratory (HUST) April - May, 2019

- Run a small course on fundamental machine learning models such as linear regressions, logistic regressions, k-nearest neighbors, support vector machines, and neural networks for new members.
- Make a tutorial about training deep neural networks with Tensorflow – a deep learning framework.
